Introducing IAM

IDENTITY & ACCESS MANAGEMENT

Access is the gateway to the critical assets of an organization.
Access controls from an important security perimeter to protect there assets against unauthorized access.
It is essential to provide near-ubiquitous access to thr assets your user need to help grow the business while protecting sensitive data from unautorized access

Identity & Access Management (IAM)
enables more cost-effective and effecient **access management, authentication, identity management** & **governance** across your enterprise.

What is IAM?

IDENTITY & ACCESS MANAGEMENT (IAM)

Is the process of streamlining the management of the user's digital identity and access in a secure manner. It ensures the **Right Entities** have the **Right Access** to the **Right Resources** in the **Right Context.**

- ## THE COMPOSITION
  IAM encompases a host of technologies, including Single Sign-On (SSO), Privileged Access Management (PAM), Multi-Factor Authentication (MFA), and password management, that administer and regulate user access to the enterprise network.

Business Benefits of IAM

Improves Security Stance

Reduces Helpdesk Workloads

Boosts Productivity

Eliminates PW Issues

Establishes Compliance

Simplifies Auditing

Enhance User Experience

Reduces Operating Costs
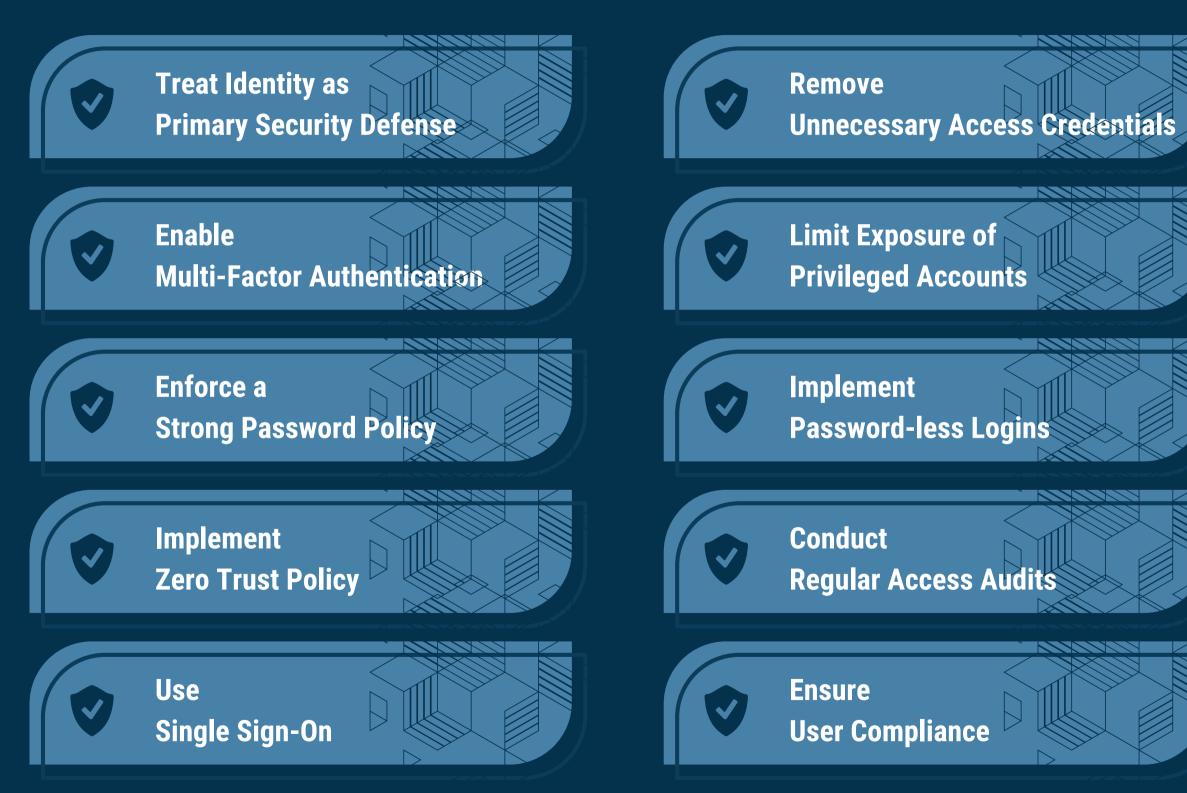

Improves End-User Visibility

Centralizes Access Control

Improves Business Agility

Reduce Potential Threats

IAM Best Practices

- Treat Identity as Primary Security Defense
- Enable Multi-Factor Authentication
- Enforce a Strong Password Policy
- Implement Zero Trust Policy
- Use Single Sign-On
- Remove Unnecessary Access Credentials
- Limit Exposure of Privileged Accounts
- Implement Password-less Logins
- Conduct Regular Access Audits
- Ensure User Compliance

How Can AuthNEX Help ?

We know that, Planning and executing an IAM strategy on par with your security, compliance, and business agility goals can be challenging.

AuthNEX can help you in assessing and designing an effective IAM strategy, processes, and related solutions.

OUR IAM EXPERTS :

01 ASSESS

IAM gaps and evaluate their impact on your business

02 CREATE

An achivable IAM strategy that supports your long-term business needs

03 DEVELOP

An IAM roadmap as per your timelines and budget requirements

Solutions & Services

OFFERING UNDER IAM SOLUTIONS

- Identity & Access Management

- Compliance & Identity Management Readiness (CIMR)

- Privileged Access Management (PAM)

OFFERING UNDER IAM SERVICES

- IAM Strategy Development

- IAM Program & Roles Assessment

- CIMR Analysis

- Evaluation & Validation

- Technology Decision-making

- Implementation & Integration

- IAM Program Governance

About Our Company

We are **Authnex** ....

We are on a mission that's driven to innovate and excel, by taking technology leadership for secure authentication and authorization to new heights.

Our Vision is set on being a global trend setter in identification security. We power the world's most advanced, leading-edge technology-led identification protocol to keep you secure.

In a critical domain where the stakes are high, compliance is key. We've got you covered with the highest standards of security compliance. Our team of techno geeks and research academics are on a common mission and goal, with the zest for being true pioneers in the industry. We are reinventing the future of digital identity in cyber security.

THE 'AUTHNEX' STORY
